

## SAVE JOBS! Stop the Global Warming Bill!

Say **NO** to Job Cuts, Energy Price Increases, and Higher Gas Costs

We, the undersigned, are opposed to SB 450 and AB 649 because expensive global warming regulations are expected to:

- ✓ Result in 43,000 lost jobs in Wisconsin.
- ✓ Cost each Wisconsin citizen \$1,012 every year as a result of higher energy bills.
- ✓ Increase the cost of gasoline in Wisconsin by \$3.2 billion over the next 10 years.
- ✓ Harm Wisconsin jobs with higher energy prices, making it harder for Wisconsin to emerge from the recession.

*WMC has my permission to add my name and company to the list of signators on the "Stop the Global Warming Bill" petition.*

**We, the undersigned, urge Governor Jim Doyle and Wisconsin legislators to oppose the state Global Warming Bill (SB 450 & AB 649), because these expensive global warming policies will make Wisconsin's business climate less competitive, and make it more difficult for Wisconsin employers to create jobs at a time when we need them most.**
