

# *What future will we leave our children?*

# Lower taxes mean better jobs, brighter futures!

Wisconsin has the fifth highest taxes in America.

And it's taking a toll on our families. It's hurting our communities and jeopardizing Wisconsin's future generations.

High taxes stifle job creation. And that sends our children looking for jobs in other states. It forces both parents to work — one to support the family, and the other to pay the tax bills.

High taxes send seniors to Florida to retire, so grandchildren are forced to have a long-distance relationship with grandparents.

We can — and must — do better. Fortunately, the Wisconsin Taxpayer Protection Amendment would put strict limits on taxes and fees in the state constitution. It allows a vote of the people to exceed the limits, and requires tax cuts — once and for all. And *YOU* would get to vote to approve the amendment!

Support the Wisconsin Taxpayer Protection Amendment for better jobs and brighter futures. Our children deserve growth, hope and opportunity!

*The Wisconsin Chamber of Commerce represents over 4,000 businesses who employ over 500,000 people in our state.*
